INSTRUCTIONS

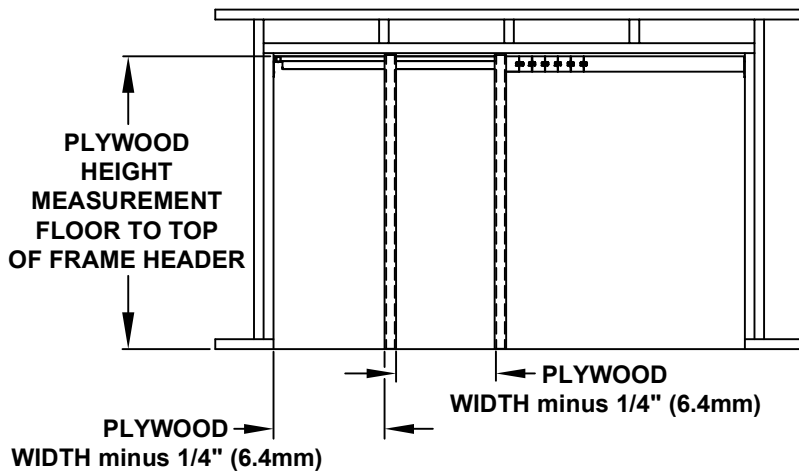

1515-PLY SERIES POCKET DOOR FRAME PLYWOOD REINFORCEMENT BRACKETS

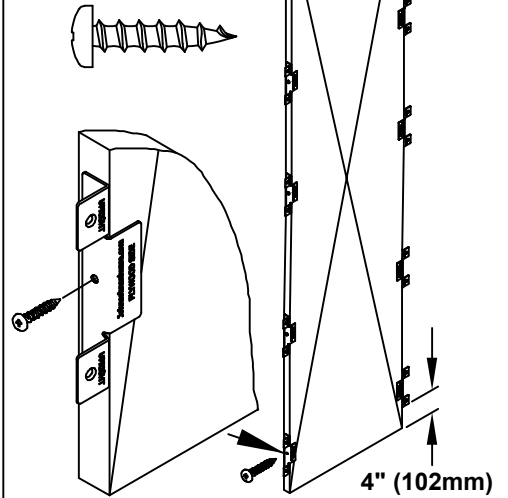

Use w/1500-1500HD-1500SC-1560-1562-2000-2060 Series Pocket Door Frames
(Instructions are for a Pocket Door Frame with a door up to 3/0 wide)

1 INSTALL Pocket Door Frame per Pocket Door Frame instruction sheet.

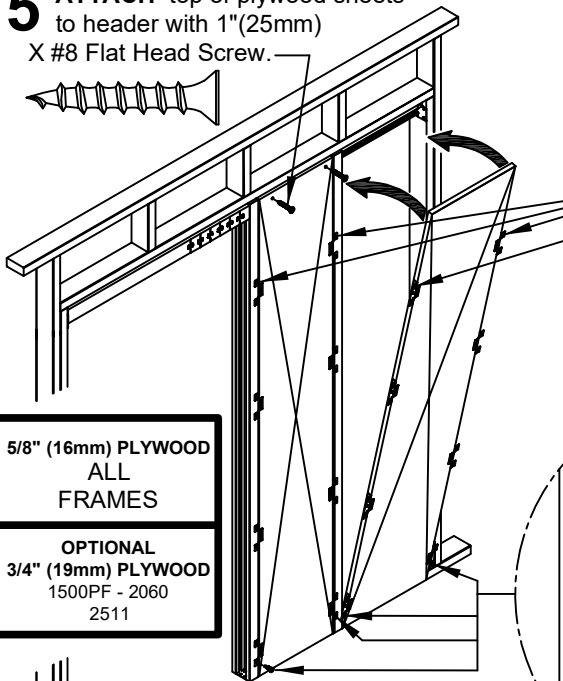

2 MEASURE space between studs and subtract 1/4" (6.4mm).
Cut plywood sheet to size, height should be the measurement from the floor to the top of the pocket frame header.

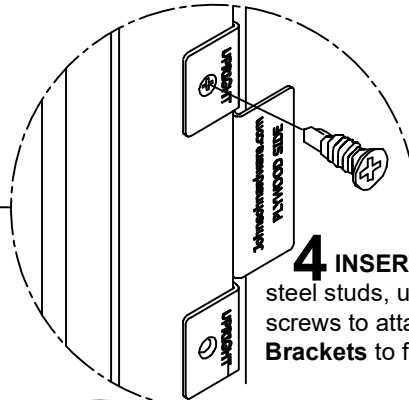

3 ATTACH Plywood Clip Brackets as shown to each piece of plywood using 3/4" (19mm) x #6 Pan Head Screws.

5 ATTACH top of plywood sheets to header with 1" (25mm) X #8 Flat Head Screw.

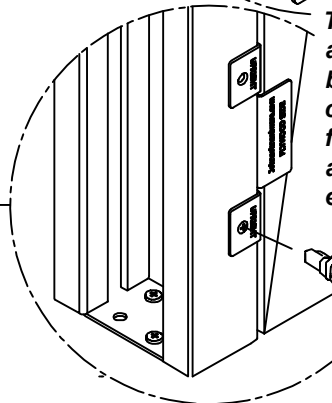

5/8" (16mm) PLYWOOD ALL FRAMES
OPTIONAL 3/4" (19mm) PLYWOOD 1500PF - 2060 2511

4 INSERT "tip in" plywood sheets between steel studs, use FOUR of 1/2" (12.5mm) drill point screws to attach **TOP** Most holes in **Top Brackets** to frames studs and rough stud.

THESE 16 screws are only needed in the very top and very bottom holes in the top and bottom brackets. These screws are only needed for the construction phase to ensure the plywood does not fall out of rough opening prior to drywall being applied. The drywall application is what buttons everything up and holds everything in place.

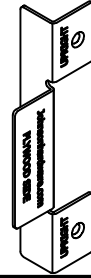

4 INSERT "tip in" plywood sheets between steel studs, use FOUR of 1/2" (12.5mm) drill point screws to attach **BOTTOM** Most holes in **Bottom Brackets** to frames studs and rough stud.
