

113F

STEEL TRACK (1138) and STEEL FASCIA (1266F)

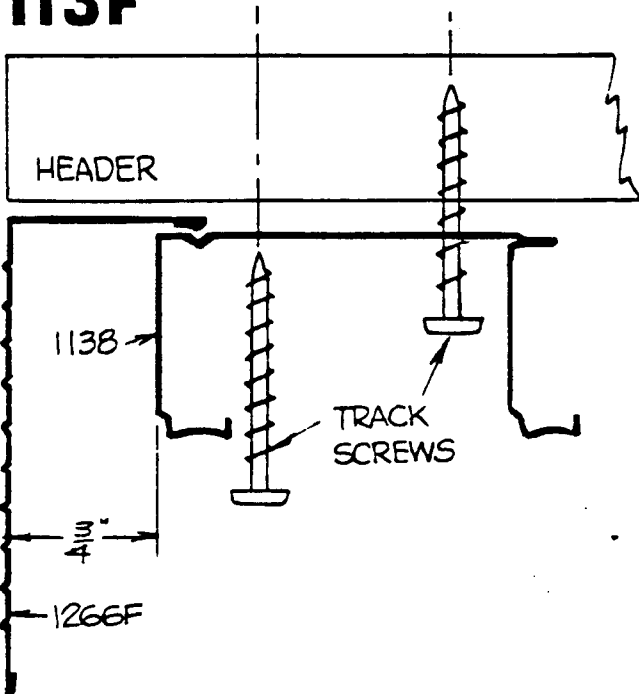

Installation instructions

Install track as shown in diagram at left. --3/4" from front edge of header. Fasten track loosely with #8 screws 1 1/4 long. Slip FASCIA between track and header so that beaded edge locates in track groove as shown at left. Tighten track screws to snug FASCIA to header. If required, additional screws (not supplied) may be used to provide additional FASCIA security.

Follow instructions on large instruction sheet when installing hangers, pulls, guides, etc.
